

Beautiful Veneers

Do unsightly gaps make you want to cover your mouth and hide your smile? What about chipped, crowded, or discolored teeth? Imagine what it would be like to have a beautiful smile with straight, strong, and dazzling white teeth! This is possible with porcelain veneers.

Dr. Baker can create this kind of smile for you. A more healthy and attractive smile can boost your

self-confidence as well as improve your personal and professional life.

Laser Dentistry... The Future Is Already Here!

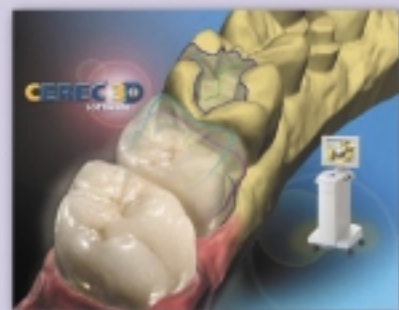

Cutting-edge Waterlase technology is a recent breakthrough in comfortable dentistry. It combines laser energy with water to make an array of treatments more comfortable, with no need for anesthetics. Also with Waterlase, there's no vibration or heat, so these unpleasant aspects of the dental drill can become things of the past! In addition to being able to treat cavities painlessly, the Waterlase can be used for other procedures, such as soft tissue treatments and laser cosmetics enhancements to the smile. Ask at your visit how you could benefit from laser dentistry. You will love the results!

CEREC - One Visit Crowns

Your smile is a great personal asset. We want to help you maximize and protect that asset: With CEREC, we can help you maintain and improve your smile more conveniently than ever before! This state-of-the-art technology allows us to offer crowns and onlays completed and placed in just ONE office visit.

CEREC enables us to restore teeth using a strong ceramic that matches the natural color of your other healthy teeth. Using a special camera, we take an optical image of the tooth to be repaired. We then digitally design the restoration, working from the image. The computer-aided manufacturing that follows is extremely precise, for a great fit when we bond the newly milled restoration to the tooth—all in the same visit! Plus, this one-visit, digital process eliminates the need for messy impressions and temporary crowns. Come in and see what a difference this technology can make in your smile.

Meet Dr. Tania Baker

Dr. Tania Baker graduated in 1980 from the prestigious Academy of Dental Medicine in Europe before moving to the United States with her family in 1985. She has successfully established her professional credentials and in 1990 received her dental degree through Loma Linda University. Her 26 years of experience help her serve your community with high-tech and high quality dentistry.

The Canyon Dental Smile Center and the newly created Calabasas Dental Spa are the pinnacle of Dr. Baker's vision of how dentistry can change people's lives. Her unique, genuine style and holistic approach for creating beautiful smiles is felt in both of her practices; dealing with the basic and important needs of family dentistry in the Calabasas Smile Center and providing more advanced aesthetic aspects of dentistry in the Dental Spa. With a true artist's passion, Dr. Baker has created an environment where anyone who walks through her doors can have a life-enhancing dental experience.

By offering both traditional dental care and aesthetic dentistry, Dr. Baker and her staff strive to make both of her practices convenient, comfortable, and quality-oriented so that her patients can enjoy the dental care they desire!

You Can Choose How White

Have you ever wanted a **SUPER-WHITE** smile?

Now you can have it!

During your visit at Canyon Dental Smile Center, we will recommend a personalized whitening plan based on your dental condition and desires for your smile.

Home Bleaching System

For natural looking white teeth with no stains.

One-Hour In-Office System Or Laser Whitening

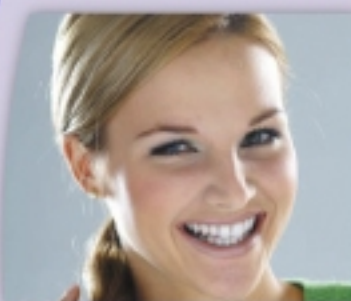

Take a first step in feeling good and looking great with brighter, whiter teeth in less than an hour.

Deep Bleaching

For the whitest smile possible. Two one-hour in-office visits plus a *home bleaching system*.

Early Decay Detection Saves Natural Teeth

With Diagnodent's low intensity laser, we are detecting areas of decay more precisely and earlier than before. This means we can prevent the spread of decay AND use minimally invasive procedures because fillings required are smaller. Also with the Diagnodent, we can monitor areas of concern without repeated x-rays and with a lot more comfort for you.

Advanced Treatment Of Gum Disease

We are using advanced PerioLase® technology, the only FDA approved laser treatment of gum disease. It can treat without surgery WITH impressive results! The laser fiber is only about as wide as a couple of human hairs, tiny enough to painlessly remove infection-causing bacteria.

Also, as it requires no cutting, this treatment is a more comfortable way to treat periodontal disease and allow the body to heal naturally. What a great way to ensure healthier gums and teeth for life! If you're concerned about your gums, or even if you've been told that you need conventional gum surgery, this laser therapy might be the right alternative for you.

New Patient GIFT!
